## Strang Smashing More Auto Records

**Two Fall at Atlanta Track—Tiger Eleven Reaches Farmington—Shifts in Harvard Lineup—Yale Practices Blocking Kicks—Academy Shows Snappy Work in Practice for Storrs Game.**

Atlanta, Ga., Nov. 10.—Two gruelling finishes, two broken track records by Strang, and rain which caused the postponement of two events, marked the second day of the automobile speedway meet.  
After many disappointments yesterday, Harding today drove an Apper-son "bullet" to victory in a ten mile contest. The Buick car with the amateur ten mile free for all by 1-100 in a second, but the Buick car had on the last lap. The Buick was driven by Joe Nelson, Chevrolet's mechanical man, and he lost on the last lap to Will Knipper when his lubricating oil became exhausted.

**Strang's New 10 Mile Record.**  
Lewis Strang was compelled to withdraw from the ten mile race for large stock cars after the first lap, in which his Fiat "sixty" had assumed the lead. He captured two other races in his 200 horsepower Fiat with ease. He defeated O'Flaherty and Christie in a specially arranged ten mile race in the remarkable time of 7:01.4, averaging about 33.5 to the mile, except in the last lap, where he drove a tire and had to reduce speed at the turns. This alone prevented him from negotiating this distance in less than seven minutes. As it was his time broke Aiken's new record of 8:02.41, made yesterday.  
In the four mile event Strang averaged 31.11. He was again compelled to withdraw his Fiat from both events in which he was entered.

**Knipper Good on the Turns.**  
The feature of the day, the 100 mile light stock car race, ended with Charles Knipper in first place and second places, drivers Knipper and Matson, respectively.  
At the start Nelson fought Matson for second place, eventually winning the honor from the latter stopped for repairs. A thirty mile chase of Knipper put Nelson in first position, which he held until the 80th mile. Then Knipper, who took brilliant advantage of the curve, dashed past him at the stands, bringing the crowd to its feet with a great roar of applause.

**Nelson Runs Out of Oil.**  
At the 88th mile another outburst arose, but this time it was for Nelson, who had recaptured the lead. Knipper clung close to him until the last lap, and then, to the surprise of spectators, Nelson suddenly slowed down. His machine had been out of lubricating oil for ten minutes and moved at greatly reduced speed. Knipper shot past him and came in a winner. Matson, who had been a lap behind the leaders, also passed the timing Buick, which finished in third place.  
The E. M. F. car, driven by Yerger, was the only car running when the race ended, Yerger being on his 54th mile.

## FINANCIAL AND COMMERCIAL.

**PRICE MOVEMENT SLUGGISH.**  
Market Still Under Restraint of International Money Position.

New York, Nov. 10.—The securities market today remained under the restraint of the international money position, as was shown by the apathy of the dealers and the sluggishness of the price movement. The check which was administered to the early decline in the price of gold, and the recovery were due to a hope that the Bank of England authorities would leave the present official discount rate unchanged at their session tomorrow. The process of recuperation of the bank's position, which was quite marked yesterday, fostered this hope, although today's movements showed some exhaustion of the forces making for that recuperation. Paris did transmit a small amount of gold to London yesterday, 1,250,000, but the result was a reaction in the sterling exchange rate at Paris today of one centime. There were additions to the engagements of gold in New York for shipment to Brazil, which are made on orders from London and represent a relief of requirements, which would otherwise fall on the London market. The call loan in New York rose at an early hour to yesterday's 5-1/2 per cent. Maximum rate and the sterling exchange rate ran off in response, although it steadied again later in the day.  
It is expected that further shipments of gold to South America will be made from New York on London account. There is a recurrence also of the interior demand on New York for currency, notably from the northwest, which exchange on New York declined further at Chicago to a discount of 50 cents per \$1,000.

Government payments on Panama canal account relaxed the sub-treasury drain on the New York money market and yielded a small amount of cash to the New York banks; so that the absorption of that amount for the banking week has reached but \$1,828,000, compared with \$4,388,000 in the corresponding period last week. Today's gold shipments to Brazil, which reached about \$1,500,000, are too added to the sub-treasury account in computing the cash outflow. These figures are attention fixed on the fact that surplus reserves on last Saturday were under \$5,000,000. The call loan rate of the latter part of the day exceeded the maximum of yesterday. The cautious temper of the speculation is directly due to this influence. In the dullness which results consideration is directed to some of the more distant problems offering for solution. The effects of the reassembling of congress and the taking up of the discussion of legislation bearing on corporation affairs loom larger in the stock market view as the time for them comes near.

The demand for some of the eastern railroad employees for an advance in wages did not escape attention as offering serious consideration for widespread effect on corporation net earnings in its expected further development. The revelations of the extent of the loss incurred by the Cleveland, Cincinnati, Chicago and St. Louis through default of a minor official of the company, which has accordingly had its effect on the New York Central shares to some extent. Systems of accounting which leave room for so long and continued a drain came in for much criticism and inspired uneasiness on the part of shareholders. The publication of the report of the Copper Producers' association for October had a weakening effect by reason of the addition shown to the already heavy surplus stocks, although that addition was much smaller than last month. Both the exports and the deliveries into domestic consumption expanded materially, but production was raised another notch to a new record. The resistance shown by the market to the rise in the money rate prompted free buying in the last half hour and made the firm closing.

Bonds were irregular. Total sales, par value, \$4,068,000. United States bonds were unchanged on call.

**Battling's Offer for the Big Fight.**  
Boston, Nov. 10.—Battling Nelson, the lightweight champion of the world, who is appearing at a local theater, tonight wired the managers of Johnson and Jeffries that he would give \$50,000 to have the coming fight between the two take place on his property at Virginia City, New Mexico, for \$30,000 immediately to bind the offer. The only stipulation is that the fight shall be one to a finish.

**Hanlon Owns Baltimore Club.**  
Baltimore, Nov. 10.—Edward Hanlon now owns all the stock of the Baltimore Baseball and Exhibition company, which owns the Eastern league franchise for this city. At a meeting today he purchased the stock owned by Moses N. Frank and Hiram Winteritz. He had previously purchased the small amount of stock owned by Hugh Jennings. These purchases put Mr. Hanlon in a position to dispose of the club franchise should he get his price.

**HARVARD CHANGES**  
**HAVE FOLLOWERS GUESSING.**  
O'Flaherty and Houston Replaced by New Men.

Cambridge, Mass., Nov. 10.—Calculations as to the probable lineup of the Harvard football team against Dartmouth and Yale were seemingly upset in several instances by the complexion of the varsity team in practice today. Quarterback O'Flaherty, who, although showing some unsteadiness, has still improved considerably, was replaced by Wigglesworth. Houston, at left end, who has not missed a game nor practice this season, gave way to G. Browne, lately recovered from an injury, and Corbett, the left halfback, gave his time to practicing punts, while Minot was idle. There is little doubt that Minot will be in the Dartmouth game, but the other changes are serious experiments, it is understood.

**YALE FIXING FOR CUNNINGHAM.**  
Blue Wants No Goals Shot Over by Ticker Kicker.

New Haven, Conn., Nov. 10.—There was no scrimmage for the varsity this afternoon at Yale field. The third and fourth teams had a ten minute mixup in which there was no scoring, but the coaches, of whom there were nearly a dozen, kept after the varsity team in every detail. The practice for the varsity was entirely along the line of blocking down kicks, for both the coaches and players fear the rushing more than any other man who will be in the game next Saturday. The varsity was kept on the defense all the time to block the kicks and the substitute linemen were given a chance to show what they could do. Paul, the substitute tackle, did especially well.

**MOHICANS IN TRIM.**  
Manager Larkie has his first eleven in shape for their big game this week on the Cranberry. He has received word from New London that the Cranberrys must be on hand for the football team in New London and a battle royal is looked for. But with the following line up the Mohicans will certainly show class. Look for them: Reardon, R. J. McManara, E. M. Sully, R. W. Sully, R. Murphy, J. H. Heureux, R. H. Marnon, R. H. Fielding, J. H. Cannonball, will arrive on a special car with a large crowd and a good game is looked for.

**Soccer Football Wednesday.**  
At Fall River: Pilgrims (England) 1, Rogers of Fall River 1.

**ACADEMY CAMPUS NOTES.**  
A team from Storrs plays the next game on the Academy schedule on Friday.

A nice place kick for goal is a new scoring asset that has been added to the Academy's effective game.  
Bulleley thinks the Academy easy to beat, since Russell was the stadium guard for the red and white, was injured.

The Academy second eleven has arranged for a game on the Cranberry on Friday afternoon with the Laurel Hill team.  
Bulleley will need a better game than that shown at their first meeting with the Cranberry if they expect to realize on their rosy hopes of winning in Norwich.

**CALIFORNIANS ARE ADMITTED.**  
Now in Organized Minor Leagues.

Memphis, Tenn., Nov. 10.—The admission of the California State league to organized baseball, the unopposed re-election of President M. H. Sexton of Rock Island, a spirited fight by the American league for special legislation occupied most of the second session of the annual meeting of the National Association of Minor Leagues today.

There was little opposition to the ratification of the agreement drawn up by J. H. Farrell, secretary of the national association and Frank Armstrong, president of the California league.  
The clubs of the legalized California State league will be domiciled in San Francisco, Oakland, Sacramento, Fresno, Stockton, and one other city to be selected.

F. R. Carson, president of the Central league, was a strong advocate of the establishment of a single drafting plan by which the major leagues might take players from the four classes of the minor leagues. Now there is a sliding scale.  
Mr. Carson also said that a player should have certain time in which to return his signed contract or incur penalty.

Both of Mr. Carson's suggestions were referred to the committee on revision.  
The class C and D leagues asked that minor leagues be allowed to deliver drafted players at the end of the season. Now these players are required to be delivered August 25.

price. There are several bidders for it and it is possible it will change owners this week.

## SPORT NOTES.

The National league meeting at New York will not open until Dec. 14.  
Tommy Dowd, the old Boston player, is in Boston for a few days. Tommy would make a rattling good scout for the Red Sox now that that position seems vacant.  
While Morley's good batting last season may succeed in landing the first base position on the Giants' team for next year, McGraw is still making continued efforts to land Tim Jordan of the Brooklyn team.  
In St. Louis they have figured out that Jim Delahanty and Tom Jones will not be regulars on the Detroit team next season. Del will probably be retained as pinch hitter, but Tom Jones will have to give way to the hard hitting California star, Gaylor.

**EUCALYPTUS**

In the National Geographic Magazine, Edgerton R. Young writes of eucalyptus under the title of "The Tallest Tree That Grows."

"Owing to the rapidly increasing price of lumber and the fact that the forest growing is of vital interest to the great corporations like the railroads, manufacturing companies, that must have, for their very existence, vast quantities of timber and lumber. The timber required by the railroads for their hundreds of thousands of miles of track, and the construction of cars and buildings, consumes the output of many hundreds of thousands of acres of timber lands every year.

While undoubtedly the valuable trees indigenous to America will be most largely replanted and utilized, many others that are not natives of this continent will also be imported and largely cultivated.  
In the case of the eucalyptus this has already been done, and so extensively is the tree now grown in California that it is being valued as its uses, that it will be new to multitudes to hear that there still live many who remember when it was first brought into this state by the late Bishop Taylor from distant Australia, its original home.

It was a surprise, as well as a revelation, to find on our recent visit to Australia that in that far-away land, under the Southern Cross, were growing trees that towered in the air 150 feet high, and valued as the famous redwood of our American west, and yet such is the fact, as some specimens of the eucalyptus reach to the great height of 481 feet. Specimens about that are from 120 to 200 feet in circumference.  
The eucalyptus is the tallest tree that grows. The timber of these great specimens is easily worked, and as it does not warp

readily, is much used in carpentry. The eucalyptus is most successfully grown in California. It has also been introduced and flourishes in India, Natal, Egypt, Algeria and in various parts of southern Europe and in some other warm countries. It cannot stand the frost and so must be classed among tropical trees. Although its introduction into California has been of but recent date (1856), already its value to that state is becoming considerable. Its rapid growth makes it a valuable acquisition.  
As yet no variety has been discovered that is able to withstand even a moderate frost, but the fact that millions of these trees can be raised so easily and quickly in California, and that its timber can be so widely utilized, is a matter for congratulation to all who are interested in the conservation of our forests and also in the introduction of new varieties of trees that will add to the timber wealth of the country.

The U. S. Forest Service reports: "The eucalyptus has a phenomenal rapid rate of growth. Seedling stands will average a height of 50 feet in 5 years and 100 feet in 10 years. Under very favorable conditions individual trees have reached a height of 125 feet and a diameter of 36 inches in 9 years. In sprout stands growth is even more rapid; trees frequently reach 3 inches in diameter and 35 feet in height in 8 months, while in 3 years a diameter of 7 inches and a height of 70 feet are often attained."

Timber investments are recognized as most conservative, investment in the commercial culture of the eucalyptus is even more safe, more certain, more profitable.  
Representative investors of Norwich have investigated and have invested. The literature on the subject of commercial eucalyptus as an industry and as an investment may be had at Room 4, Chapman Block.
